*Where technology and nature  
make learning fun*

PRESCHOOL  
MEMBER OF KINDERLAND INTERNATIONAL EDUCATION

# SKOOL4KIDZ CAMPUS

## @ One Punggol

### Why Skool4Kidz?

Skool4Kidz Preschool emphasises holistic and multi-dimensional development through inquiry-based learning. Preschoolers in our care develop critical 21st century life skills through play and technology. We are a member of Kinderland International Education group and trusted with over 45 years of Early Childhood expertise in the Asia region.

Led by Early Childhood industry veteran Dr Jane Ching Kwan, our affordable programmes focus on child-appropriate Technology-infused immersion. Our intentional learning framework balances screen time with outdoor physical play. Skool4Kidz preschoolers are nurtured to become Tech-Savvy, Wholesome, Creative and Future Ready citizens of Singapore.

### Theme-based Curriculum

Skool4Kidz Preschool's integrated thematic-based curriculum integrates various learning domains that allow our children to enjoy authentic learning and connects them to real-world experiences. Using a multi-faceted approach infused with technology, digital resources and outdoor learning, these programmes equip our children with Future Ready 21st-century life skills. We strive to nurture the creative mindset of young children. We cultivate their savviness in technology while promoting healthy bodies and curious minds for learning.

Our preschoolers are nurtured to be winners at their own pace, including in award-winning global arena.

*Spacious and conducive classrooms*

## Designed With Your Child In Mind

The Punggol estate is resplendent with nature and its beauty. It provides the inspiration for our campus to infuse its learning spaces with the ambience and feel of nature. This nature-inspired design creates safe spaces that connect children to nature. It evokes an outdoor environment for learning and playing indoors.

A green space with natural and authentic materials created in each classroom serves as a provocative invitation for children to connect to the nature. We believe in the importance of a sense of place relating to our natural environment. Children explore the sensory properties of natural materials, create endless and timeless play and construct knowledge that is meaningful. More importantly, technology and sensory-rich materials are used to support our nature curriculum that promotes environmental protection for a green and healthy future.

Skool4Kidz Campus @ One Punggol is designed using pedagogical aesthetics to create a pleasing environment. It invokes curiosity and inspires creativity. Inter-connected spaces allow children to explore, investigate, build an understanding of the world around them, foster communication and relationships.

## Our Dedicated Learning and Play Features

### Playgarden

This is a dedicated indoor green playground lit with natural light. It is specially designed to meet our children's physical, social and emotional needs. Featuring a purposefully-built climbing gym, stepping stones and a soundscape, preschoolers are encouraged to play imaginatively, socialise and cooperate with peers.

### Inter-generation Activity Room

Skool4Kidz Preschools partner with St Luke's Eldercare for a meaningful and transformative inter-generational activity programme for our children in this campus. This activity room provides a safe environment for our children to interact with the older generation in the community. Through age-appropriate activities, they will have the opportunity to build positive relationships through understanding, graciousness and kindness for others.

## Artelier

Art is very important in a child's development. It encourages creativity and out-of-the-box thinking, two important skills for lifelong success. We have created this inspiring Artelier with a featured Flowy River Wall and a conducive atmosphere to spark artistic and creative expression.

Here, our children are exposed to a myriad of opportunities to paint, draw, model and craft using various mediums including recycled and natural materials. In addition, our Digital Art Station provides the children with access to digital tools for creative exploration and design of three-dimensional craft objects. Process-focused art experiences are encouraged here to support their developmental needs.

It also contains a display area for the children's 2D and 3D artworks to foster a sense of recognition for their creativity.

## Interactive Walls & Pathways

It is always fun and educational anywhere within this campus. The interactive walls and corridors encourage our children to be engaged in unstructured play as they walk, jump, bounce or hop. Children can place and rearrange objects on magnetic walls to learn how they work. The interactive mirrors aid learning more about bodily expressions, stretch and taut their muscles. The sprung dance floor has colourful markings for simple fun such as marching, hopping and jumping. All these helps to promote interaction, friendship, creativity, motor skills and spatial awareness.

The corridors also have plants and pets for children to connect with nature and learn about other living things. Some hallways even have hydroponically grown herbs and vegetables that end up on plates in the dining hall.

## Cook2gether

Our community dining space is designed for children and adults to relax, enjoy their meals, interact and build meaningful relationships. The child-centred MasterChef cooking area encourages safe culinary experiences. Cooking sessions teach children valuable life skills such as nutrition, hygiene, food safety, self-confidence, teamwork and decision-making. This is where we have our very own Junior Master Chef series too.

## Passionate educators who make a difference

All our teachers undergo constant training and development. This ensures they are academically and professionally qualified. They are also trained to create a nurturing, safe and comfortable learning environment for our children to excel in.

---

## Quality support system

Skool4Kidz offers an effective, all-rounded curriculum that ensures your child's development.

Skool4Kidz's curriculum's approach is developed by a team of pedagogical specialists. Thematic-based and supported by meaningful use of technology that develops creativity, our curriculum encourages critical thinking and social interaction skills that prepare preschoolers for the 21<sup>st</sup> century.

Through play and interaction with technology, child-friendly tech-bots, gadgets and games, our programme is structured for young children to develop computation thinking, active problem solving, social interaction and the confidence to be creative.

---

## Subsidised school fees

Enrolled children in all ECDA-licensed childcare centres, who are Singapore Citizens, receive Basic Subsidy for Childcare and Infant Care. They may also receive Additional Subsidy if they meet the eligibility criteria.

More details on available subsidies at:  
<https://www.ecda.gov.sg/Parents/Pages/AOP.aspx>.

## Our Services

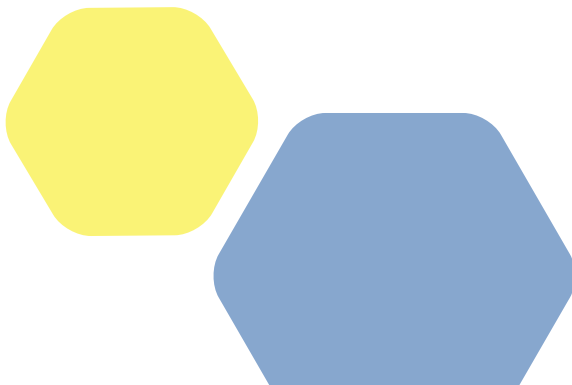

Skool4Kidz provides Infant Care services for children from 2 to 18 months old, and Childcare programmes for those 18 months to 6 years old.

---
